

Eyveris s.r.o. ESG / Sustainability Statement

Last updated: 10 February 2026

Eyveris is committed to responsible innovation and sustainable business practices aligned with European regulatory and ethical standards.

As a deep-tech biotech company developing advanced in vitro and in silico models, our sustainability approach is embedded in how we design, test, and operate.

Environmental Responsibility

- We develop non-animal, acellular testing methodologies, contributing to reduction of animal use in research and safety assessment.
- We prioritize resource-efficient laboratory practices.
- We minimize chemical waste and ensure compliant disposal procedures.
- We reduce travel where feasible through digital collaboration.
- We select suppliers and service providers based on quality, compliance, and responsible

Social Responsibility

- We promote equal opportunity and inclusive governance (see Gender Equality Plan).
- We maintain safe laboratory and working conditions.
- We support transparent collaboration with academic and industrial partners.
- We contribute to safer pharmaceutical and medical technologies through improved early-stage testing.

Governance

- Transparent decision-making at shareholder and management level.
- Clear division of responsibilities among founders.
- Compliance with EU regulatory frameworks (GDPR, research integrity, laboratory safety).
- Zero tolerance for corruption, discrimination, or harassment.
- Regular internal review of policies as the company grows.

Proportionality

As an early-stage SME, Eyveris applies ESG principles proportionally to its size while committing to scale governance and reporting practices as the organization grows.
